

How to synchronize your remote – internal antenna 2014 model and newer

- Step 1)** Make sure all Bat-Caddy carts that are around you have the battery unplugged!
- Step 2)** Make sure your battery is unplugged for at least 5 seconds
- Step 3)** Plug in the battery
- Step 4)** Turn cart on
- Step 5)** Hold the remote close to the battery and hold down the **stop** button on the remote for 10 to 20 seconds, make sure the **Red** LED is lite on the remote
- Step 6)** Watch the handle LED lights, they will flash when the remote is synchronized
- Step 7)** Try the forward button and see if the cart moves

Note: If the lights do not flash repeat the process again

How to synchronize your remote – external antenna 2013 and older

- Step 1)** Make sure all Bat-Caddy carts that are around you have the battery unplugged!
- Step 2)** Make sure your battery is unplugged for at least 5 seconds
- Step 3)** Plug in the battery
- Step 4)** Turn cart on
- Step 5)** Hold the remote close to the battery and hold down the **forward** button on the remote for 10 to 20 seconds, make sure the **Red** LED is lite on the remote
- Step 6)** The caddy will start moving when synchronized
- Step 7)** If the remote fails to control the caddy repeat these steps but hold down the **reverse** button in Step 4
